Since 1963

Natural, fresh and healthy eggs...

OUR STORY

In 1963, our foundations were laid in a small farm built by Ahmet Remzi Bey with 600 chickens in Saruhanlı, Manisa. By mixing health and flavor, we have produced eggs that everyone from the age of 7 to 70 can safely consume, and we still produce. Making consumer satisfaction and health our priority, we have always aimed for better and fed chickens with organic feeds in order to get healthy eggs from our chickens.

While doing all these, we keep in mind that Güres eggs come to your tables and you share these tables with your most precious ones. With this precision, we have been producing 'delicious eggs' for 58 years by keeping our quality and hygiene standards at maximum level. Over the past years, Güres egg has left insatiable flavors on the palate of Turkish people.

Within the Güres Group, we have been meticulously working for more than half a century so that you can safely consume the egg which is the miracle of nature.

Güres Group is one of the largest fully integrated egg producers and one of the leading brands in the world in the open area of 700.000 m², in an indoor area of 300.000 m², with an annual egg production capacity of 1.500.000.000

High efficiency and quality agricultural production is made by using 100% natural fertilizer.

The agricultural products are processed in the Güres Feed Factory and turned into feed.

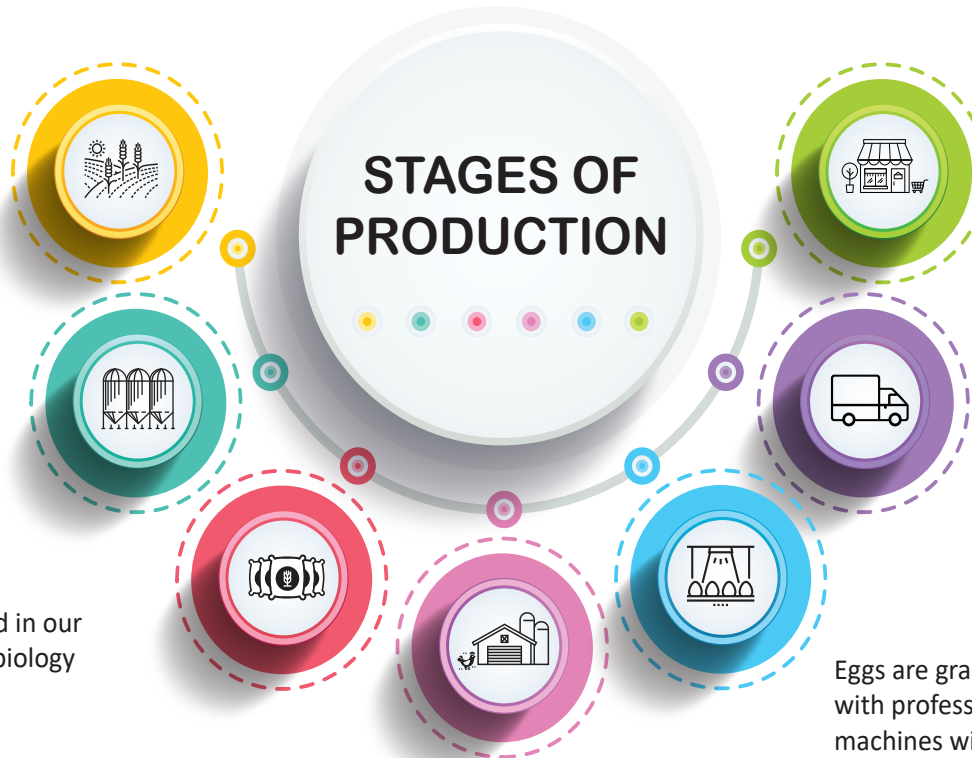

Feeds are analyzed in our quality and microbiology laboratories.

The produced feeds meet only the feed needs of the facility in accordance with the closed integration system.

Eggs are graded and packed with professional grading machines with automation systems.

The products are delivered to the consumer through national supermarket chains, online market services and dealership, and take its place in the tables with its Güres Egg flavor and quality.

They are delivered to the sales points with health-certified, hygienic packages
